

Remember to show ALL work to receive credit!

Monday Homework

Use the number line above to answer the problems. Be sure to show your REWRITE if necessary!

1. $5 + 3 =$
2. $-5 + (-2) =$
3. $7 + (-3) =$
4. $9 - (-2) =$
5. $-4 - 3 =$

Draw a number line for each problem (on a separate sheet of paper) and arrows to illustrate the addition problems described. Then solve the problem.

6. Start at -1. Move 5 units to the right, then 2 units left.
7. Start at 5. Move 3 units left, then 6 units right.
8. Start at -7. Move 10 units to the right, then 3 units left.

TUESDAY HOMEWORK

1. If a glass of milk was $\frac{4}{7}$ oz full and then you spilled $\frac{1}{3}$ of the milk, how full is the glass now?
2. If Caitlin's cat eats $\frac{2}{3}$ can of cat food every day, how many cans should Caitlin buy for a week?
3. A container holds 27 ounces of ice cream. How many $4\frac{1}{2}$ ounce servings is that?
4. Make up one integer problem using integer chips to show your work. Use + and - to represent the "chips".
5. Find the missing value: $\underline{\hspace{1cm}} + -3 = -9$

WEDNESDAY HOMEWORK

1. Sarah has \$11 in her account. She bought lunch for \$7. How much does she have left?
2. The temperature in Alaska was -3 degrees. The weather man says it should warm up 8 degrees today. What temperature will it be?
3. Nyla counted \$2 in change in her pocket. She owes her mother \$8. If she gives her what she has - how much in debt is she?
4. Maya was swimming 5 feet below the water. Her mother was yelling at her from a boat. Her voice carried 14 feet. How high up on the boat was she?
5. Kelsey & Ariana were buying new socks. Kelsey's card was declined because she had \$-12 in her account. Ariana helped her out of debt and bought her shoes. She gave her \$20. How much were her socks?

THURSDAY HOMEWORK

1. Ryan was 7 points behind the leader in the archery competition. The leader earned 3 more points. What was his point difference now?
2. Kayla was 5 feet behind Mia when Mia stopped to take a nap. When Mia woke up, Kayla had traveled 16 feet. How far ahead is Kayla now?
3. The submarine is cruising at a depth of 70 meters, then dives 85 meters, then ascends 40 meters and then dives 25 meters. What is the submarine's final depth?
4. $(-8) - (-7) - 1$
5. Find the missing value: $\underline{\quad} + (-3) - (-2) = -9$
